Firebase Hosting provides fast and secure hosting for your web app, static and dynamic content, and microservices.

Firebase Hosting is production-grade web content hosting for developers.

2)Now in order to install all the

3) Now we can run the application as all the dependencies are already installed.

`npm run dev`

On running the above command we get the output as shown in above image thus the website will be hosted at: <http://localhost:5000/>

4)If we go to <http://localhost:5000/> we get to see
